

Bundle Dumpers

Solutions Through Creative Innovation

Machine Operation

Lumber bundles are tilted and elevated to vertical unscrambler chains. These chains remove the top layer of the bundle and feed single boards for the next procedure.

Bundle Dumper Unscrambler

- ◆ Independent Hydraulics with hydraulic lift and tilt controls
- ◆ Automatic Height Control
- ◆ Remote Control on Pedestal
- ◆ Quick SetUp as Machines are Shipped Completely Assembled
- ◆ Increased Saw Throughput—No waiting for forklift to bring each set of lumber to cut
- ◆ Maximum Saw Efficiency as boards are always in position and ready to cut.
- ◆ Handles & Cuts varying lengths of lumber
- ◆ Heavy-Duty Construction
- ◆ Custom Sizes

Footprint
