

Spiral Insert Knife Surfacing Heads:

Quiet Cutting: Looking for a better option on surfacing heads? Spiral knife insert heads make constant contact with the material offering reduced cutting noise - typically 20 decibels less. Each long wearing carbide knife has four edges that can be dulled before replacement. These heads improve material finishes on cross grain, lower long term tooling cost, and eliminate sharpening costs. Our spiral heads offer special radius edge inserts to reduce any chance of knife corners marking your material. Heads use 15 x 15 x 2.5 inserts.

Head prices include set of knives.
