

Turnable Knife Insert Side Heads

We offer several insert knife heads styles in all sizes for economical surfacing of material on smaller moulders and planers. Heads come with or without side cutting spurs for dado and rebate cutting. Once the knives dull, you simply turn the blade around to the next sharp cutting edge - 2 or 4 life cutting edges. Once all usable cutting edges are dull, a new low cost long wearing carbide knife is quickly inserted. No need to purchase expensive sharpening equipment. This option offers one of the lowest cost ways to size and surface hardwoods.

Turnable Knife Insert Side Heads

Knife Cutting Length	Cutting Diameter	Bore Size	Part #	# of Knives
50mm (2")	125mm	1.25"	IC-125-4-50-1.25	4 w/ Side Spurs (2 each side)
