

Round Nose Bits

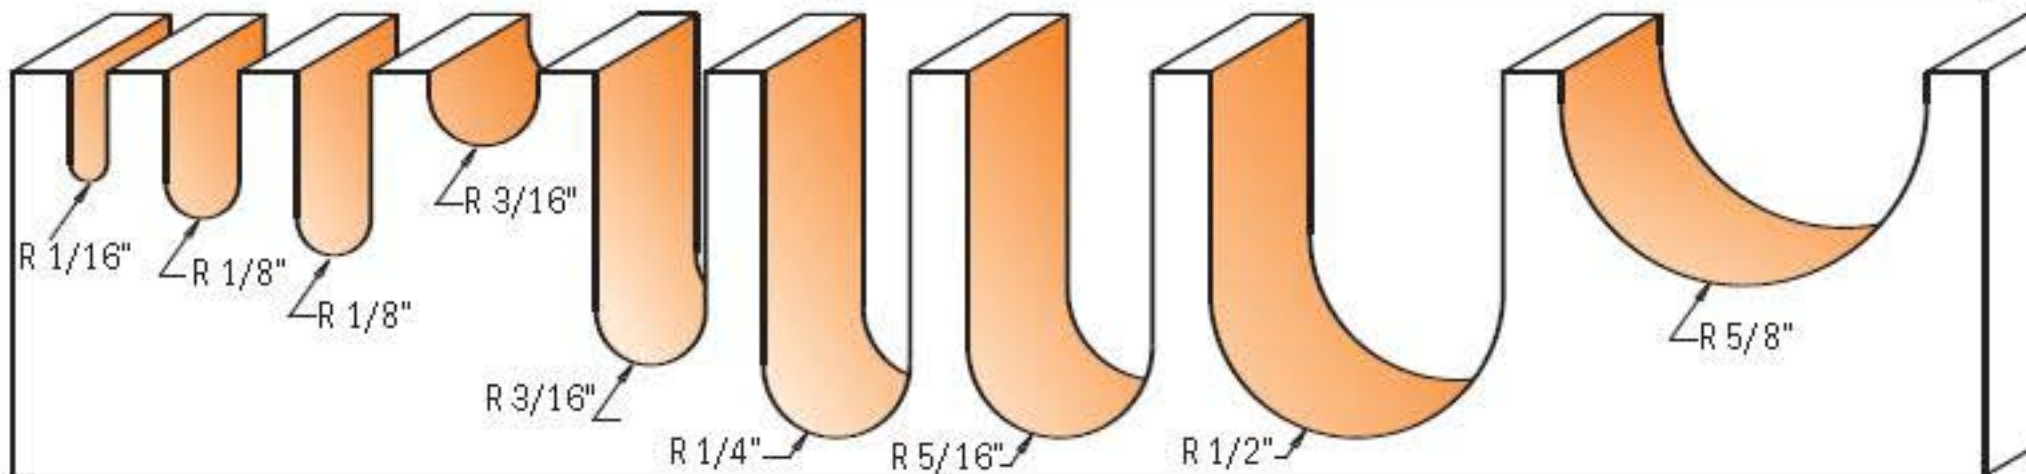

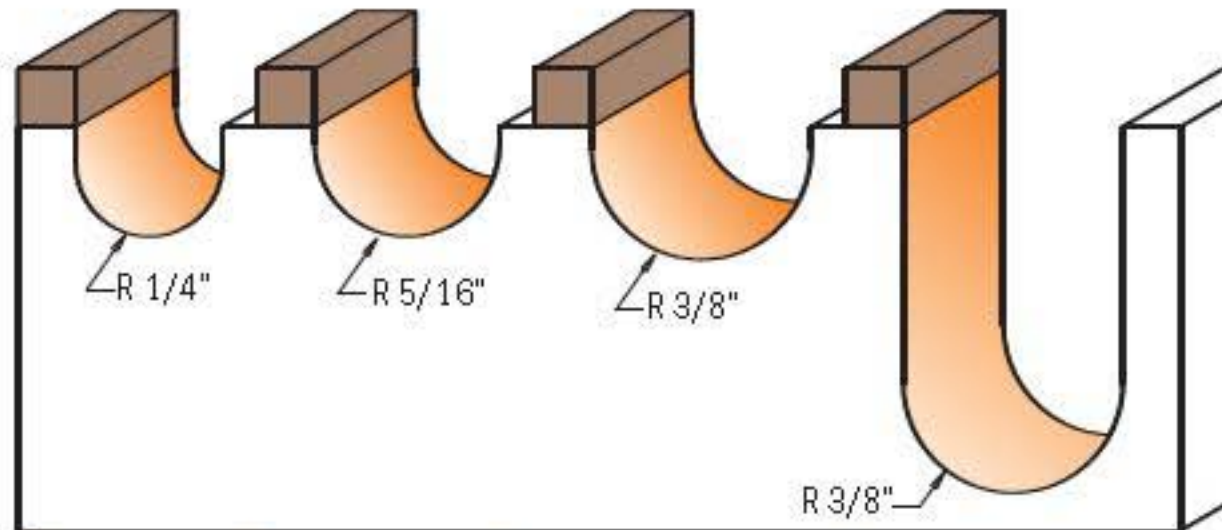

814 - 814B

Decorate doors, drawer fronts, panels or any flat surface with CMT Round Nose Bits. These solid carbide or carbide tipped bits let you create grooves in any wood or wood product. For even more elaborate decorations, we also offer top bearing bits - use your own template with one of these bits to produce truly unique doors and drawer fronts. A favorite item for professional sign makers, craft makers and hobbyists.

Safety Precautions:

More than one pass is recommended when making cove edges. To prevent splintering, begin with a shallow initial pass and deepen gradually.
