

**822**

The best Slot Cutter won't give you a clean cut without a top quality, perfectly concentric arbor. That's why CMT arbors are carefully machined from special high-strength steel and precision ground in all critical areas. Available as arbor only or with 7/8" (22mm) bearing.

These three wing carbide tipped Slot Cutters feature anti-kickback design and CMT's trademark orange P.T.F.E. Industrial Coating. All cutters feature an 8mm bore that fits CMT's 1/4" and 1/2" arbors.
