

Bevel Trim Bits

Application: Cutting bevels in plastic laminates for a clean, finished edge

- The 41 Series Bits provide a range of bevels from 8 degrees to 45 degrees and feature a ball bearing guide.
- The 66-100 solid carbide bit creates a 7-degree bevel and includes a self-piloting feature that eliminates the expense and upkeep of a ball bearing assembly.
- Cuts all plastic laminates.
- Use on Hand-held routers, table-mounted portable routers, and laminate trimmers for trimming plastic laminate.
