

Ripping

Ideal for general construction applications, including fast, efficient ripping and crosscutting

This blade cuts rough framing lumber, high quality finish lumber, plywood, OSB, and hardboard siding with the smoothest, fastest and most accurate cut. The thin kerf design requires less cutting power from the user and the saw for better control over the cut. Diablo's unique design, extra-tough steel plate and proprietary carbide tips deliver longer life — and frames more houses — than other framing blades.

Item#	Diameter	Machine Use	Application	Teeth	Arbor	Kerf	Hook Angle
