

Melamine/Laminate/Laminate Flooring Blades

Ideal for Melamine/Laminate/Laminate Flooring.

The thin kerf, Triple Chip Grind (TCG) Tooth Design is specially designed to cut laminate flooring (Pergo®, Armstrong®, Swiftlock®) and double-sided laminates and melamines cleanly, leaving a smooth finish with no tear out. Laminated materials are highly abrasive, so these blades feature a TiCo™ carbide blend ideally suited to harsh service. Note: laminate flooring should only be cut with a sliding miter saw or table saw (never with a “chop” style saw).
