

General Purpose (Beam Cutting)

Ideal for cutting oak, pine, plywood, pressure treated lumber, Wood Composites, and beams.

An excellent choice for table & miter saws, this blade leaves a smooth cut in a variety of applications, reducing the need to change blades between tasks. Use it for rip cuts with a smoother finish than dedicated ripping blades, or make quality crosscuts in solid wood or plywood. Great for both sliding and "chop" style miter saws as well as table saws.
